

How to save a book to your library

littlescribe!

1. Preview your book to check that all pages are edited and in the correct order, and that you are happy with your work.

2. When you are ready to add your book to the library, tap **'next'** to take you to the next step.

3. Give your book a title and change the author and the illustrator if needed.

4. If you want your book to stay in your own private library, tap the padlock icon to close it. If the padlock is left open, other Littlescribers will be able to read your book. You can go in and change this at any time.

5. A dialogue box will tell you that your book is uploading, and will be in your library very soon!

Teaching Tips:

- ✓ Ensure that all of your pages are edited, with no black edges, before you add your book to the library.
- ✓ Student or child accounts need to be connected to a parent account before their books can be saved to libraries other than their own private one.
- ✓ Remember, your book needs to be 12, 36 or 60 pages in length, to be a 'printable' book.
